WEDNESDAY MORNING, DECEMBER 17, 1881.

THE "AMERICAN" CANAL. Under the new treaty with Nicaragua the United States is to acquire an exclusive right to-construct and maintain a canal across the Nicar-aguan fathmus by the river and take of Sau-Juan. This way may be called the "American" our Attentic coast and European ports, for which 1,000,000 would be a small calimate. We have then 5,000,000 tons plainly it sight as soon as this canal is open for traffic land we will leave the fraffic of the west coast of South America to the Panama count upon the hypothesis that it of \$1 per net ton, and deducting \$1.300,000 for he maintenance of the canal and for towage, we have \$1,000,000 for dividends, which is a small fraction below 5 per cent. on \$84,387,676; the maximum cost of the ephal arrived at ty-doubling the engineers' estimates. Continuing, be makes other statements of great importance to is commerce of the North Pacific cough showdevelop from the construction of the canti, without which it would be impossible. There is the lumber traffic from Paget sount, extendsest and to Europe. In order to have a conception of what this amounts to, let the sceptic visit the Liverpool ateamer ()regon and examine which that vessel is minished. Yellow cedar, when finished, is as bea till'd as satin, is as easy to work as cynress, and surpasses oak in duru-bility. All of these timners are superl, and are be found in enormous quantities, convenient for shipment, and can be put on board of sailing vessels and auxiliary propellers at a small

INDIAN RESERVATION LANDS.

The "noble red man" certainly was entitled to commendation for one thing—he was a glod jude of grass, and wherever he found good grass there he made his selection of bunning grounds for binessif and his fellow-braves, and of penturage lands for their pontes. Wherever the red-eq un i shaggy-headed buf-alo fornad i six cho cess antesix cree thore was to be seen the con...al white tents of the nomalic savage, with the line smoke curling upwards into the thin, dry air of the pains. And the traveler who ionries through the northwest will be sure to note of at although the Indian Iwes by grazing and landing, he has invariably selected the very best land for agricultural purposes, though not one Indian in a thousand has ever become a lilke of ite soil. Take a journey through the Since valley in Yakima county, W. T., or across the Umatilla reservation in our own state, and you will notice broad expanses of hear ital land admirably adapted to diversifled farming and cultivation of cereals, which are see for no better purpose than the pasturage of several thousant wall-eyed and rat-toles age of several thousand wall-eyed, and rates as potted profes. Yet these lands are the homes of the Indians by treaty, and those treaties must be respected. Not only that, but any and all legication having a tendency to nullify or otherwise impair the force of such treaties should be disc praged by the men and newspapers of both political parties. It legislation seeks to accom-plies the nullification or impairing of existing trea les, the Indians are sure to be taken advantage of 'n some way, and another outbreak will be the result, followed by such atrocities as shocked the lanc from California to Mains in

1877 35, and greatly retarded the settlement of treger and Washington during those two years.

We desire to raw public attention to this question for the reason that a proposition is about to be brought before congrees for a lease of 500,000 acres of the (row restruction in the Yelpowskone valley, Montana, to a syndicate of Colorado capitalists at a riere nor inal rental. Now it is true that the amount of territory which the Indians, either by calclery leases could be extended to 6ther parts of the . Croix reservation, then would came similar exhaustion of hermage, decadence of food and acareity of game, and all the other petry vexatior's which form the germ for an onthurst of suring warfare. No, this alone, but once in acquirate this suyle of legislation and it will extend, it he interests of needy speculators, to the Umatilla, Lapiwai and Simose reservations; and then after the Includes have suffered extending ther, after the Indians have suffered several rears of real or fancied oppression at the hands of the lesses, we shall have a repetition of the harrors which made the collightened world hald up is hands in Loly horror when the numiss of Nez Perce Joseph of Scar-faced Charley were nertioned.

The proposed reard of these lands is one cent

per acre, or \$5000 per year for the whole area of half a million acres. Now if this large body of have is worth a vent per acre, it is worth ten certs as well, for each year of eccupancy, it is said that Secretary Teller, who is a Colorado man himself, favors the proposition. This is not any subject of special wonder, as Mr. Teller goes out of office on the 4th of next March; and it is quite probable that he will be a private eliteral helicity. probable that he will be a private citizen before the bill becomes a law, if it passes at all. Now, while it would be quite improper for Mr. Teller, secretary of the treasury, to engage in a cattle speculation of this sort, there would not be the slightest harm in plain in Mr. Teller's engaging in :: as a private citizen. Hence, we have no don't lut be will be found, whenever the proposition comes up on its final passage, a strengers acvocate of the bill. But all such legislation is permissions for the reason that, while the nation can clearly seed its way into it. It counts begin to see its way out of it; and there is no sel so,—even with the old off the secretary as a Teller—to what evils in the way of Indian warfar and frontier our ages such legislation may leaf in the near totars.

This style of legislation, or anything of the

san e sort, which goes to impair the vitality or invalidate he force of a treaty, leasens the dig-nity of the American government and deterior-ates, its shold upor the respect of our own yea-ple. It has nothing in its behalf to be said, save In the interests of a monogent syndicate which may be composed of fofty patriots or of selfish exhibiters—and the latter is by far the more propable of the two. The patry sum of \$5.50 a year to be haid into the treasury for the benefit of the Crow Indians, amounts to nothing, is worth a nything at all, it is worth no than eight times that sum. It will not do to ex-periment in legislation of this sort concerning ou. Indiar. "wards." We have had enough trouble with them already.

FARMING IN DARIOTAL A gentieman from Detroit, Michigan, who has recently visited what he calls title best wheat region on the globe," in Dalota, found "the farmer in abject powerts, unable to meet as ments in their unchines or their land." The resion for this poverty he says is that the consor ly, where rates of a grasspage rannous more copy, where rates eave nothing for the farmer. He ween Pargo and Duluth the Northern Picific radioad charges H cents a bushel for grain, 3 cents for yieum. c arges and live cents more goes to the handers—32 cents in all. This is the reason why the farmers get only from 1 is to 50 rents for their when. But when the arronor with to hay anything they njust pay 30 Junts a fallon for kerreene, 18 cents a nound for east pay k, 820 per 1000 for poor, communitariner, 27 seems a point for flour, 812 a ton for coat, an i 85 a bord for wood. The farmers are hoppinglish. ingithat during the winter congress will give them relici by restricting the railroads to fair rates, and the cuties of the farmers of Michigan to stry away from Daketa until the railroad mon-

opoly is broken. A Dakota farmer, R. G. Plat. of Sprintmant. A Pastota Tarmer, R. G. Plat. of Sprintwood, in a letter to Excelstact's discusses the situation very intelligently, and though by no matus an clarrist be admits that it is far from encouraging. He particularly curp maizes the necessity of "mixed" pa dentary cap naizes the necessity of "mixed farming." He is cliefed that the Dakota far ner cannot afford to be 'absolutely dependent pon the ctop. "The main point's with a far ner should be to raise all he possibly can on his own famp, in order to availed very outside expense. The so his rich and feighter and there is no reason which he former bursely have been available to be a few former. why the farmer marcet turn a good profit cut of it if he will give his attention to the other bigher-priced grains, such as briley, oats, but of wheat, flex, and peas, and in conjunction with these raise cattle, hogs and sheep, making them so fit into one another us to greatly reduce the expenses if each."

an entire dependence on we cal, the "highito said unjust exemption law, and the infigure is and unjust exemption law, and the infigure in the credit system, are the fire evils which is prome particularly under Mr. Flats not ce los a Deleta furner. The credit system soulies the price of farm machinery, and the fairner who finds himself hard sums together exceed the receipts from taxes up takes adanting of the exemption law to avoid payment. Under the one crop system, farmers are left a malicipate their profits and run than \$1.10,000, and must, to some extent, reconcide the farmers to the taxes which the railrouts impose upon them. in debt. The Detroi gentleman also notice, the great evils of the credit system. The arents of the masking terms of term implemants, he said swarm over the and like locusts over Egypt, tax up up in their fight property qualification actual order or order and trained mortgages at high rates of interest, for in Pakoka meney brings from 12 to 25 per rein, at rintiona, banks. Two machines that it beingents solt two years ago—ine for \$190 and the other for \$220—he saw sold for \$33 and \$25 respectively, and they were in good or inc. 345 respectively, and they were in good or det. couraged, and there may great fulling of in the arcount of fall planghing for wheat. Mr. Platt has more full in the cultivation of migrat, and says that Dakota farmore aloud not cease to raise wheat, but that they should begin to raise of ter things.

other things.

Fut notwithstrucing those obstacles to prosperous farming: in that region, the St. 22 all Phonon-Press says it is presty certain that a servible increase in emigration to the west may be expected next season, partic

from the eattern's ates. The depressed condi-tion of rade and the shutting down of manu-factories has placed tens of thousands of workingmen in a d-specate position, and frey begin to turn their time its toward the broad acres of the west that lie was ing to receive them and to furnish them with food and raiment in

plenty. There is peath of room in the swester, country for all who are willing to work.

This is doubless true, but the men who are willing to work should not be compelled to were against artificial and needless obstacles. The fact that It is not impossible for the railroads to be more liberal in their charges for carrying grain to market-that it is not necessary for milroad to charge as much from Furge to fr buth as is charged from Chicago to Liverpool is shown with course and termination of the zecant ware read war even have a fresh i hastration, of the ineviable to tency of unrestrained competition to lower the general shudard of rules, even when its ex-treme effects have been removed by the re-astal-lishment for pools or of rule agreement. Ronds find out, by the experience of a way, that they can profitably do business on a smaller margin than they I are been accustomed to, and the public ge s used to travelling at a cheaper rate. Rearly every war has been to lowed by the establisher out of regular rates slightly helps these that ar wailed before it began.

THE POSTAL TFLEGRAPH.

THE POSTAL TFLEGRAPH.

A Washington correspondent of the New York Heyald recalls the action taken on the portal telegra in hill at the last session of colleges, for the purpose of showing the attitude of the two parties in reation to the same. The record shows that very near the case of the session of corgress in July last Senator Hill, chairmaniof the senate committee on postoffices and post roads, succeeded in getting my the bill to establish a posta telegraph system. Previous sent the resisted by severa senaters, and it is said that the committee on the order of business were very much mortified when they found that they had falled to provide a programme long sanagh to crowd out the postal telegraph bill. The senate, on the 3d of July reached the et of the list of business agreed upon in carcies, and Senator Hill of Colorado moved to take up the bill reported from his committee. The motion was at once antagonized by Mr. Ingel's of of Kanasa, who moved to take up the bill reported from his committee. The motion was at once antagonized by Mr. Ingel's of of Kanasa, who moved to take up the bill reported from his committee. The motion was at once antagonized by Mr. Ingel's of of Kanasa, who moved to take up the bill reported from his committee. The motion was at once antagonized for the retief of the left of and ald in the company. To provide for and ald in the control of the left of the opponents of the Order of the Order of the Ingel's of the Order of the Order of the Ingel's of the Order of the Order of the Ingel's of the Order of the Ingel's of the Order of the Ingel's of the Order of the Ingel's

senators that that Edmunds goes to fur. No one is permitted now to send in a coad to a senajor dutil 2 o check in the afternoon, and (5:2) when the senate is a fjourned up one is permitted to enter the senate chamber with two u.s. minutes have shaped, a senator in commenting upon the exclusiveness hedged about the senate chamber said. "I dure say it is all right. It gives us an awful look of morality at any rate, mil that is something."

Bradlines in the Standard: "Sherman Defeated. His Attempt to Fight the War over with Jeff Daris Futlie. No More Adams to Barn." It is claim that Old Tecomsen is never to be forgiven by the bourbon confederate de-morner for the great part he played in sup-pressing the rebellion.

No utteraire since Lincoin's emancipation proclamation has to stirred up the organs of the democratic party, or provoked from them so much furtous demonriation, as Mr. Blaine's Augusta speech. They are still at it. By that token it may be known how iniquity writhes under expectate,

Business Starting .

Boston Transcript.
The went trude was active last week, the sales of the stap of bother up 3,123,000 peu als domes-the and 176 600 pounds foreign; both, 4,105,900 pounds. The sales of the two weeks before were 1,834,900 pounds and 1,801,700 founds. This sudden reviva, has given much encouragement, and other the sing indications are identished in the report that fewer mills have been shat down this year than last, although instances of shortened time and reduced force have been more abundart. In woolen manufactures there are noted gains in confidence, agreater framess on the part of hollers, and more radiness to buy althour communes. These statements are

on the part of holiers, and inore maliness to buy almour commons. These statements are, however, can ded with new reports of reduced wages in I hil delphia carpet mills and in some New England chot mills. It is apparent that matters are not yet adjusted to one level in this great industry. But the distinished opportunition of the last yeur has kept stocks down, and as soon as there shall be any movement it will be felt all along he line.

Another great staple—leather—has been a greater at mand lately, with a shiftening of pricess for some qualities of includine skins and the driess goots. In this trade, too, are confusing rejects of cessation of work in large tapneries; some feing to the effect that it is hallatempolary—device in order to work down prices of skins or ad ance the unarked i for leather, and, others that the works will romain idle units string. It is interesting to took that the leather-numbers who have should down and the wooken nills that have lowered anges belong to the protection-lowing steel feet apprehence for the states for very middliker a remedition of the statics have lowered sages belong to the prelection-for-ing style feet sylvanial Another movement looks very much like a repetition of the tactics for-menty jemployed in that region to influence cor-gress against a recucion of the tariff, it not a favor of higher duties.

Subet Levenge fer Irint-Americans,

trish World.
On all pides there is avidence in abandance of a determination on the part of those who bat-lied under the Blatne and Logan ban are to ecq-up the fight for the protection of America 1 i-dustries. Every man with Irish blood in his-veins ought to feel proud of being this to halp in this work. En rianc is looking with covetous eres on America; She can never hope to again plant her fing on our soil. But she does note again to make us her industrial slaves. It will be sweet reverge for Irish-Americans if by their efforts they of a preven; the realization of these expectations. a determination on the part of those who but-

Baker (Sty Tribune. 188. 18.

"This state is sadly wanting in intelligent oncoming. It is at a bereficent providence would favor this duggish and benighted state with function whose 'removal' would leave a hopeful vacancy."

The foregoing is from the Portland Orsanos-IAN, and no liner works were over uttered by that is set. A minimigration of wide-awake, intelligent near, both laborors and capitaities, and an awake ing or emigration of the suggards, is what this state sadly needs, and what it must what this state saily needs, and what it must have in the near future if it is ever to amount to "shucks."

China dealer—' Never saw such dall times in my life. Don't sell a new set of dishes a week." Caller—"That's rather odd. People can't est without dishes, and they are sure to get brake a yeu know." "That was the case formerly, and Tre often had families buy a new set very month; hat these good times have give, it shas don't get braken are more." "Trey don't?" "No. You see, it's becoming fast immake to latter to do their own work." "I hiladelph'n Call.

GDSTAF WILSON, Sec.

NOTES FROM WASHINGTON CITY Hebe of Interest to Oregon and Washington Ter-

· [COURTSPONDENCE OF THE ORE CONTAS.W Washington, D. C., Dec. 9.
Bott houses of congress have found plenty of
business awaiting disposition. In a gone deal
of this the readers of The One oxiaa are directby interested. It will, no det bt, interest them
to know semething about the penting legislation (of Oregon and Washington. First, then,
as to the estimates submitted by the secretary of
the treasury of the amounts required for the
fiscal reading June 20. Sec. Those are a

fiscal year ending June 20, 396. They are as

inscai rear ending June 30, 386. They are as follows:

| Ealaries and expenses of the collection of internal revenue in Oregon, \$14,500: support of Klamaths and Modocs, \$8190; confederated tibes in infidite Oregon, \$8900; Diwamish and other allied tribes in Washington, \$40,000; Indians at Klamath agency, \$40,00; Makal's, \$6600; the islandah agency, \$40,00; Makal's, \$6600; the islandah agency, \$40,00; Indians at Richards and Ordi-lebrates. Makul s, \$6000; Qui-nai-elts and Quil-feli-nivs, \$5000 Klallams, \$5000; Wa ld Walla, Cryoso mailing, \$5000; Yakarış and ottyrosimil Imaliling, \$5000; Yakarış and ottyrosimiling, \$20000. Incidental expenses of the latter in service in Oregon, \$20.00; Washington, \$50,00. Purchasing right-of-way to the light-truer fight and fog signal on Destruction is labd, Washington, \$55,000. The secretary says 1; which is a prominent point on the cast, we a "this is a prominent point of the coast, up a light here would be an important aid to marigation."
The following measures are on the calcular

to piecesed to the consideration of executive business. This motion was defeated—yeas, 12; yeas, 81. So, in spite of the effects of the opponents of the measure, the senate took up the bill.

This is a cutions fact that of the twelve senators opposing its consideration two only the repair licans, Messac. Addicts and Ingalls. The tendemocrate were senators Bayari, Batler, Coky, Gerian I, Juns, Jones of Fiordia, Leadison, Pugh, Vance and Vest. Of those voting in favor of consideration twenty-three were repullicans and shift democrate. On the following day consideration twenty-three were repullicans and shift democrate the more favorable to the measure new, since they tue to take executive to trol of the government. The Bords Washington correspondent says that Rimmans is as arbitrary with the senator and senators in the fall washington correspondent says that Rimmans is as arbitrary with the senator that the senators that the federation of a militage from Partial accountry school. To his credit he has different out all of the theap lobbyies who used tolonge about the senators that the Edmunds goes to fur. canal route. It is not only more feas ble than any other, but will serve our commerce better. Recent advices from Washington say that our nary department will send an expection to Meanagua soon to make a closer survey of the route than has yet been had. Several preliminary surveys have hitherto been made, and Admiral Apparen, who knows more about Ameri-can istamus caust routes than any other man can istamus can review and any one that again, at only that the Nearnqua routs is the best of all, but that serveys of it bither o make can be materially improved. The Nicaragua Canal Company of New York, with feneral Grant as president, was organized two or three years ago. It has inade estimates of the cost of the work, which Adverted themes is confident will be reduced by miral Ammen is confident will be reduced by calculations based on more careful surveys. He places the cost of construction at a sum not ex-

checking \$65,600,000 at a high estimate, while-the Panama canal will certainly cost double, and may cost five times. hat sum. At Panama and may took the times has sum. At ransam one-eighth of the whole estimated cost has already been expended on one-sixteenth of the excansion. The Punana causal will be a little less than fifty miles long. That of Nearagas will be 172 miles, but of lake and river water wis the results of the large and traw water way there will be 119 mles, and of actual exca-vation only 53 infles; much of the latter com-paratively light. Exparations will be avoided by construction of locks, as the lake is 110 feet above tide water, and a locked canal can be cheapir built compared with one cut down to the sea level. Admiral Ammen, in a recent statement, gives an estimate of the business that might he expected for the Nicaragua canal. magni de expected for the Statagut canal.

We says: "There is our coasting trace, which would pass through it; 1,000,000 tens for the present would be a low estimate, and in less than hair a century it would be five times than hair a century it would be five times than hair a century it would be five times that amount. The grain product for export 40 will exhaust the range by the expiration of the Burope, of the north Pactic coast, now excess. 2,500,000 tens, and the vessels, partly laden with the range by the expiration of the aforeshid prese, d not sooner. And if such leases could be extended to fither parts of the range by the expiration of the cations. iron and coal and partly in ballast, going than and total, and party in the canal for cargo, would not be less than 1,000,000 tons. Then we have traffic to and from Japan, northern China, the Philippide and Sandwich Islands, the islands of the south Pacific, New Zooland and Australia, to and from

it will prove to those of our least coast and Eu-

wine product of California, and we see at once what a mine of wealth the construction of the

The methods of assessing state taxes to Marnesota are very unsatisfactory in their results. They fail to bring into the list all the taxable properly, and fail also to have the listed proper-ty equilably valued. The state auditor says in lils report that a correct assessment of the inrisble property, such as atocks, bonds, money, etc., would said many nillions to the tax list and retuce the unjust harden now resting on. stiona nelebbor add fr. asfers to

he viable property of the state. A vast autount of this class of property escapes its fair propor-tion of taxation through that provision of the peal. Debts are created for the purpose of evading assessments, and thus the "rehember, adraft mostropiatus man," by unfair y reduc-ing his assessments "arbitrarily assesses its other schooliers the weight of na unjust proportion of public burdens. This is not only unjust, but it has a tendency to Irwest the moral base of a community by composing men in self-defense to subscribe to property statements, known to be untrue. A person having ten times as much property as his neighbor should pay ten times as much tak. The rule, however, is the more property alman may own the less is his proportionate tax.

of visible property is made by a comparison between the tax list and the insurance policy by which it is covered. The assessed value of structures and of thirthen classes of personal property, constituting the insurable property of state, was in 1884 valued at \$42,000,000, while the aggregate insurance philicies in 1883, and which of necessity covered only a part on If this property, amounted to \$198500,000, le-mention that its insulate value diff not ex-ceed perhaps, one-stird of its insulate value." The additor says that if the law wood a not permit a greater bearance on properly than its assessed valuation, and it the law required all notes, boths, so-catilies, etc., to be stamped the day of the stamped for dayation its -2 and signed by the assesser, and payment on them should be forbidden unless they have such cadersement, —he believes the result would be to add \$50,000,000 to the tax lists. He is not prepared

RAILROAD TRAFFIC SUSPENDED

Ful y Two Feet of Smw in the Williamstt Val og Fortland 14 Daykness Last Sight-Mu-h Discomfort in the C ty

The 16th of December, 1884, a likely to 1888 into history with the memorable wind storm of January 9, 1850. While soverer weather than the chief man from some line in this focality, the chief mahahitant cur not call to mind so great a stowfull in the Willamette valley. Heperis at this writing indicate that the mowerit in the Inhand Lappin is unprecedented, and the

The people of Portland who let then homes Monday might to attend places of autoenner — no fewer than 1500 did so—and those whom other pleasure, or duty, called from the firesidn were little prepared to face a twenty-mile an hour eastern wind accompanied with san we They did not expect a storm, and hoped the wintry blast was a baseing gutt quickly to be driven back to the frigid regions whence it came, by our grateful southern white. The see with ratified early were autourhed yesterday merning upon arising at the strangely unfant har weather. A blinding show storm is most imvelcome in lises favered regions than tills, and here where no preparations are ever made for her-where no preparations are ever made for extremes of weather, such a storm as presulted reacting a modelled area body. It paralyzes business and worked discomfort to all classes of people, except the plumber. He was bose of the situation

the situation

STEERT CAR TRAYFUE SUPPLYIND

The first inconvenience left by those living at a distunce from their places of business after having become reconciled to the fact that water pit is were forcen, was having a walk to their places of business. If sidewalks had been ejeared, the task would not have been appalling, but with heavy forfits in every direction and continuous enow, and wind in one's face whichever way he turned, and no arctice on one's feet, and the pencify of protection affarded by oromany warps, it required some hittle thravery

the windows rathled, and the wintry blast penesrated halls and rectation rooms. All the schools, except the High school, dismissed for the afternoon, and wasther officially ordered or not, public education in the primary departments, at least, must be suspended until the wasther moderates. Sending a child who but any district to gun such weather, is I the short of cruelty.

HOW TRADE WAS AFFECTED

With a few except one, retail business was totally paralyzed. Men diduct venture out except type precessity, and probably less than a intuited lasties were seen on the luminoss streets outing the day. At 'his harvest season for all classes of dealers, the loss of a day strade is no em il matter, and tarre was no comfort in the thought that yesterdays as a gration would be repeated baid one of the largest day. in the case of the

or nummers. Furly last evening it was "way up." A large lift of snow had secuminated on the top of the holder on the west side, tip-ing it al., and the strong easterly wind had forced it over against the west elde of the had forced to over against the west 800 of 30 well. When the gas was timed for around town the holder commenced to settle and owing to the way it was lighed, the holder over the restern side cought fast on the brick work of the well on the west side if the holder spake down all the roof stood it an angle of thirty degrees. The has was at one, shut off from the degrees. The has was at one, shut off from the city ind he with ordered to go about making gas as feet as possible, in his point that by filling the his deer enough pressure might be rected to raise the holder to its proper position. Mestre Leone d and Green had a lerge force impleded will the eximity indeavoring with takins indiverse to gift the holder, but up to 10 or took lith; it cheefed may good hay hip or the lith it is the conner of two fith holder, but up to reverse cannot tell for certain. The implayer invividue as the conner of Twe fith and B stocks is about triaby for use, and will be filled as quickly as passible so there is no prospect of the trivent bunglife I could not things continuing for any length of lim.

THE THEAT IS Owlig to the failure of the gas New Maket heate was in inky darkness although o hor were terr with and comfortable when the hour we very with and comfortable when the hour arrayed it copening the door. Mr crisines was very distinct eping or with the play at I in it disposed to the play in the play at I in the play at I in the play could not have seened other than a but and only in the play could not have seened other than a but. He added if the u cof tar ps or cancles, but Mr. Howe, the lesses of the the ater, would be convent to this, since it would cause him in other case to forfeit his mensure poles. It was probably better that they did not, to the play could not have seemed other than a hulesque, in consulcing the surroundings, deed had the actors gone on with their parts mirrely oblivious to the indicrousness of state a street light. Quite a number of reserved seats had been gold, and the brokening admission to the galery, but face one would be the Northein Pacific reached Wallala ounciles on finite had night, and boys seeling admission to the galery, but it is not be considered on Fourie Fag ?

WIND STORM AT ASTORIA.

The R R Thompson Duabled and Driven into a Dock

The Post Considerably Damaged-Roof of the Parker House Blown Off-The Wind Portyseven Miles per Hour

The Flectwood reached this city from Astoria at 4 in yesterday afternoon. She encountered ficating icc letween Kalamn and St. Helena, and a most a garge at Willow bar which she had some difficulty in getting through. It will not be possible for any craft except ocean steamers to get through to-cay, so the freetwood has temperarily hid up. From the officers of the boat, an account of a terrible wind storm at Astoria was obtained. It was the most severe ever excent ced in that cit. The lim rouf of the Parker. was obtained. It was the most server ever ex-perment in that cit. The tim roof of the Parker house was blown off, and at times the wind ob-lained a velocity of fort-seven miles an hour. During these guest it was very dangerous to w. I on the roadways built over the water, and few attempted it. Following are particulars of the storm from yesterday's leturan, a copy of which was corteously furnished The ORELOGIAN I. M. Hables, slewed of the Plestronian. 13 Mr Hankley, sleward of the Fleetwood

At an early hour yesterday morning the keen east wind which had been blowing coldly from the inland mountains grew into a gale, the flaming stars that glittered in the course vault

the inland mountains grew into a gale, the flaming stars that glittered in the consave a sailt above were obscured by leaden-colored clouds, and a few small flakes of snow were staken from their folds on the frozen earth. By, o clock the wind was booming in the first to the south, shricking in the rigging of the seases and whistling in every crack and cramy through which if forced intelligence by developing through which if forced intelligence by developing through which if forced intelligence by developing the said cramy feathers, impalicable particles of dry snow that saffer in through window alle, and under doors, and eases and over the rooks to drift in the streets below. If was a snow that saugers ed not lought of moisture, as dry as dust, and line as fit tr, and glistening like powdered singar lip of the moisture, as dry as dust, and line as fit tr, and glistening like powdered singar lip in differend we sewell by the blass into finatastic forms and huge pites, while the increasing wind shook the windows and rattled at the doors, and so the signs to awarging and howled do win the channers and a yest effective lips and whished around the corners and roared through the streets, all linally meetings few erres currents from the north, the demons of the air went whiring out to see and we said their rengance on the hapless martiners off when morning daying their brable world was

when morning day ned the visible world was When morning dawned the reside world was white, an angry sea was bedding at our doors, a dell, leaden storm-cloud hung towering over the early and the wind grew colder as the sanw reased falling. Few indeed were the houses into which the snow had not found entrunca, and there are attentions in life more pleasant than to have to sweep snow from kitemen flours before starting the breakfast fire. There is stwary, be it summer or winter something about the east wind that is exasperating to an Astorian. It is so harsh and dry and resping it less dull and depressing, as lengarant it is so himsely uncomfortable compared to our warm, gental threat from the west, that it shows comes without a welcome and leaves without regret. Particularly is thus the case when I brings dark snow clouds on its wings, and the only mitigating excumstance about it is that it cannot trumph. It can only play at winter, for presently comes a warm breath from the great of our atour doors that melts into the balmin air of spring.

At 6 o'clock the B. K. Thompson aware out in the howling dark for Portland. Hardly hat she got well in the stream when the tiller roose parted, and she diffied down past the city. The rudger was useless, but by stopping the engines and going about and working back, (apt'in Springue got her ow'r abresst of the Main street wharf, against when the table when a gainst when the table when a gain the content and the caster whe Stark-growth 18071-7

Starts, bee 17—The National sugar growers' esociation met this morning. Missouri, Ill nois, Indiana, Iowa, Wisconsin, New York and Kansas were represented. President tolen an denounced the Spanish treaty, in the opening address, as destructive of the American sugar trade. Belchet (Missour), Powell (Wisconsin), and Scoville (Illinois) were appointed a committee on resolutions.

The of Delibert Rell.

Prilabel phia, Dec. 17—The committee of the council considering the question of sending the old Liberty bell to New triesns soied, i to 5, that a report be made to the council with a favorable recommendation, "authorizing the colomissioner of markets and city property to take down the bell, and directing the joint c m mittee appointed to attend the fair to take charge of the bell, and hand it over to the nut of the Delibert Rell. The further the property of the Bell, and hand it over to the out-of-the left, and hand it over to the out-of-the left, and hand it over to the out-of-the left, and the property of the second left. A FFATURE OF THE TRIAL.

I EPI OR, DEC 17—A peculiar feature of the marchist trial is flat each criminal endeavors it throw the biame on the other, with the exception of Hemslorf, who has the courage of his opinion, and tries to shald his accomplices in the crime. He bears the character of feing kind-hearted in his disposition and in markably gentle with women and children Fiber pleads that he was involicated when he care Roysch money to defray the expenses of their work. He has the best change of acquittal. Remslorf concluded his harming to day. He raid he knew he ricked his own life in the came he had negated in, and if he did he will die a service and in obselesce to the scriptural concluded.

GOUNON SENSE NIFDED A few foo ish persons in karsas have given vent to item indignation against a color of burning him in effig. Thereby Ley have given him far more importance that he deserves. Their conduct has furnished him will capital stock for business as a "professional tempt; since man for months to come. tenables him to talk of the intolerance of opponents, to now ato talk of the intolerance of opponents, to now as a martyr, and to pretend to an importance that by no means belongs to had It lenables him to say, in substance I can a great and I represent a great cause, and all the powers it evil are against me. Flee why and I burned a effigy? They would be now in person if they could. Wicked men like the so, son differ probables and crucifie! Chris Per cention that is helps a great cause. This is the sain of St. John's speeches since some half degree persons in a bed, district a Kansak, who lozen persons in a back district in Kansas, who badn't sense enough to know that charktants n is always best disposed of by neglect or contempt, increased this individual's estimate of bimself 15 burning an effigy who have called

It is a fact that the most effective war to it porters is to oppose it by injudicious racibods. If you carry opposition to the point of effort to suppress the thing by intimidation, persecution or violence, you only consecrate it as a holy cause in the mind of the devotee, awaken has than ever to contend for it. There is no folly an gross but persecution will make hose who chersall it ready to high! for it, and, if trom's tex-tremut, willing to the for it it is or of the profoundest facts of humar nature that men are controlled by their idealbut he has not gone very deeply into the springs of burnan conduct who does not know that these

*L John is one of a great class who fail to see the ill ng that chiefly engages their thoughts in its relations and proportious to other things. Their eagnestness, therefore, takes a direction that converts a moral and philanthropic purpose into pure folly — The liquor traffic, and oubled y a source of great evil, they surpose they can 'olish by an edict — They "ton, for the unattennable," and "stand up to be crubte?" for it That was the philosophy of the late probrotion campugn. They take no note of the fact that there are multitudes who will not forego what they regard as the proper use of thing, I ecause But the effort for prohibition h suot vet spent

its if Undoubtedly it will make yet greater ex-ections than any it has hitherto jut forth. Nears, probably, must elapse before in devoted adherents can be convined than it will not be accepted as the policy of the country. That it will not be is due mainly to the fact that most men do not incline to surrender their own judg-ment as to what is or is not good for it emselves and these too are persons never intoxi rated with drink. Left men say what they will to the con-trary, there is in this matter a principle of per-sonal liberty that will not be given up. The sooner thin is accepted as a fact, the sooner the ment of the honor question, which is close resuiston and high home There are great tumbers to whom many of the arguments made for prohibition of highers would be good for prohibition of tebacco, and others again to whom the same arguments would be good for prohibition of coffee and animal food. Individual legislation is gong to decide all those and all similar matters. Mr St. John may be a very wise mun, but he s not to be the judge whether any man save hita self will have a glass of claret with his dunner of THE IRLUSCRES OF THE SYCI

book of Jos knew man that the writer of the wrate the very suggestive question, 'Hast thou ratered into the treasures of the snow." Who indeed has, from that far-off day to this, ever 'ully entered into the treasures of the snow' Who ever thinks, for instance, except in the the live in a land associated in our thoughts the summer and soushine, where snows are infrequent and fleeting, quote their proverb with pleased and hopeful faces aimid the d scom forts which this wintry phenomenon brings to them, Multa neve, multo per te - "Much snow, much bread." But who in a land of much snow ever thinks of the reason there is to white such a tender protection to the bosh n of hir ample

The themses tell us that show water contains a greater amount of ammonia their in equal weight of rain water, that these feathery flakes SHOW sweep down from the chambers of beaven a great amount of available nitrogen which would otherwise be lest to the earth The process if we understand it was electrical one. The pressure of it is white meteor through the art causes the a tropen and oxygen con tauced in the art to units along its course and produce auta and This act is very favorate e to regetable growt. It is a very valuable form of food for plants. And who has ever entered into the treasures which in his way prepared for our fields and farest among that winds of hearen. This is now supplies the whose of nearent. This said is now suppress the earth with moisture containing it argumentous of cathonic read, which penetrates in o the 40th which is the action of frost Lasbacome the a tegrated and reduced it has fall and melli a company. tegrated and reduced in hise titl and main a tegrated and reduced in his ow melt also itself through every clod as the si ow melt

riching the earth to an incilcul, dejection it also performs the very useful service of keeping the earth warm. It is a test conductor of hont. Where the surface of the ground a covered with snow its temperature very rurel, discends be ow he freezing point, even when the sup i incumitant ar is fiften or twenty he rees cold er. In the old stories of cape so this first at tre times in Virginia, we are told that he in this men angument's robe in the salw and his nenggmetkielen niskept without much dissopi cown in them uniskept without much dissopi or writer of one of fortil rough the right TI writer of one of the Isa as of I and I I the true iden of a when, seen given it i are he said "Tho I to I have a way West is warn roughly nont of m the ages is a significant of the second of t fthe spow, n r even u

wing to the general blockade, which has cuteff so many so trose of news. The Oregon'an assume only a a rg.e-sheet to-day.

ONE OF THE COMPLET SECTIONS There is going to be trouble for then val tunnstrute on the silver question. Leck a speech in the senage is in a direct on of it. He reserves to much that the pew administration will be favorable it continuous of alive comage and to the dee of silver for all the pur-teses o' money, and he hads the conflig day when 'the encinies of silver will be driven from the other end of the avende'—meaning they rules office and the treasury. It is bethe sed nowever, to it Mg. (evel and is st early opposed to a policy which whiled make after the exclusive currency of the country and evable men to providebis contracted at 100 cents on the are going to have our currency maintained on a sound gold base, or bring it diven to a short a frer basis. It must be one or the other. I'v cessive country of silver is morrowing every day i'v gold basis of the currency, unl if

1 VISIONAR), SCHEME

Recently we had a special dispatch described to

exploitation of a scheme gotten up by apt. Sedfor. Plin of the British navy, who has been raveling in the Bocky monatain territories, for construction of a redroad from Cheyenne, Wooming, to Hudson's hap—the object being to open a new roads for transportation of cat to to

Europe A proposition to make an Arctic buy he shipping po ab of American cattle is just resurd interesting the state of the constitution of the least, and therefore we reprint from the Salt

Lake I found an expression of aptim Pin's

opinions. He says

The English are assentially beeferding in the populations. He says and the freework important cas from the following must have not the freework important cas from the secondary are. For from satisfactors, the five cattle, are not definited because of the formal independent of the five as meat it found telegratin determented by that pirtues in the found to be great determented by that pirtues in the found to be great the terrorized by the intitude property. If the cuttle into the one the curs from the gradeattle runges of the west and son mass to the Albanth seabout that we near made in the mass of the first that the area of the first that the cuttle of the first that it is proof to mid it is difficult as doth into in particular the first that they may be find in facility in the first that they may be find in facility in the first that they may be find in facility in the formal manner that the contract of the first may be find in facility in the first that inference in the lattice of the first may be find in facilities as the done possible that they may be find in facilities as the first constant in the lattice of the first may be find in facilities as the first may be find the first manner.

After Murch + the democrate will have be
